

SMART AI FACE RECOGNITION TEMPERATURE MEASURING DEVICE

FK02GYW

Face Recognition

Face Temperature Measuring

Fever Warning

Data Query

Mask Detection

Longse Technology reserves the right to all design changes for product improvement

High-quality Details

24 x LED White Light

LED fill light can help camera system to shoot, Can fill the scene according to the actual situation.

2 x LED Infrared Light

Better capture of images at night to achieve more uniform light on the screen.

All Aluminum Body

Integrated aluminum alloy forming process to achieve

2 x 2MP AI HD Cameras

Temperature Measuring Module

Better capture of images at night to achieve more uniform light on the screen.

7inch IPS HD Sreel

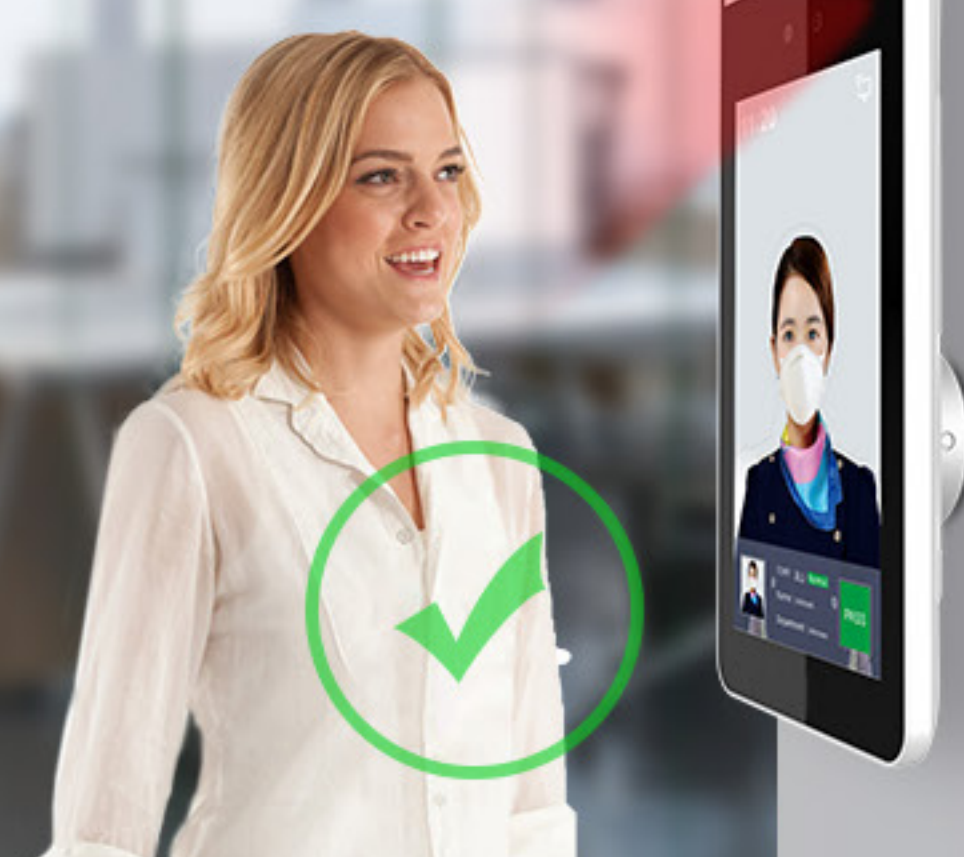

Clear picture quality in HDNo dropped frame color balance.

1.2mm Thick Tempered Glass

Smart Control And Prevention

Face Recognition

Smart interception of strangers

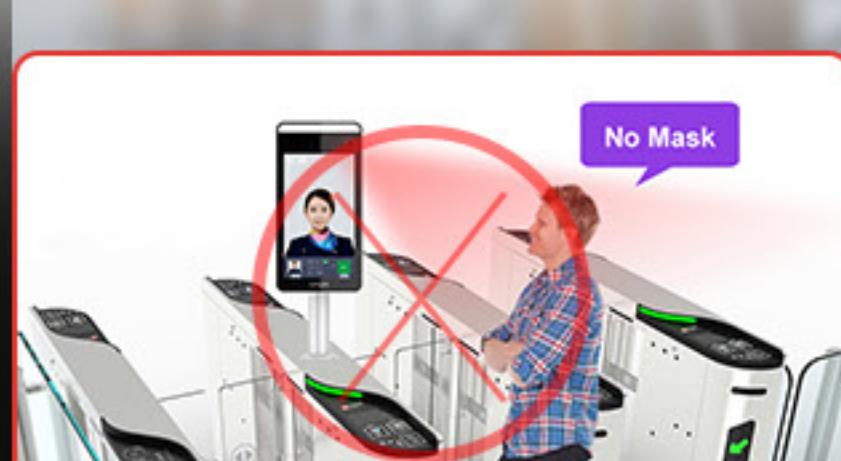

Body Temperature Detection

Smart interception of abnormal body temperature

Mask Detection

Reminder mode: remind to wear mask after passing the authentication without mask
Mandatory mode: unable to do authentication without mask, remind to wear mask

Various Mounting Brackets

Floor Pole Bracket

Wall Bracket

Aisle Bracket

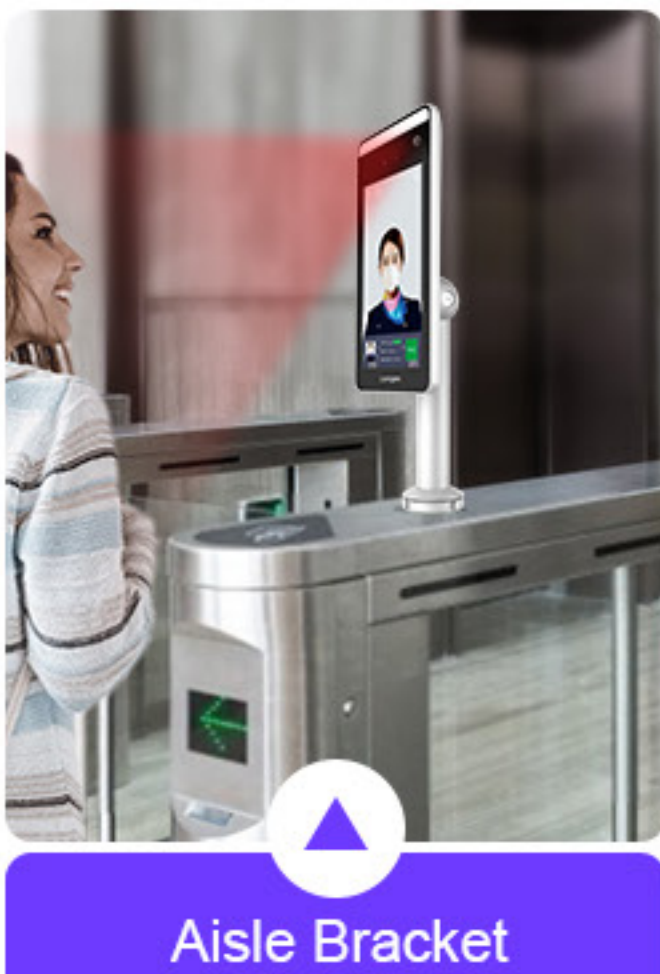

Table Bracket
